1. Masking Rule

The screenshot shows a database tool interface. The top pane displays a SQL query with three red boxes highlighting masking rules: `decrypt`, `[2,5-20[masking]]`, and `D[2,4-10[decrypt_masking]]`. The bottom pane shows a table titled "그룹핑 하고싶으신 컬럼의 헤더를 이곳에 드래그 해 주십시오." (Drag the headers of the columns you want to group here). The table has five columns: DBMS_ALIAS_NAME, ORG, DECRYPT, MASKING, and DECRYPT_MASKING. The rows list various database aliases and their corresponding masking rules.

DBMS_ALIAS_NAME	ORG	DECRYPT	MASKING	DECRYPT_MASKING
